

Spring Symposium: Ethical, Legal & Social Issues of the SmartHEALTH Integrated Project

Purpose of Symposium

The aim of the symposium will be to provide a forum for open discussion around the ethical legal and social (ELSI) issues relevant to the SmartHEALTH programme in recognition that SmartHEALTH is a complex set of converging technologies that needs to be integrated into different healthcare systems within different European countries. Attendees will include SmartHEALTH partners and relevant external experts.

This symposium will provide an opportunity for the SmartHEALTH consortium to:

- Clarify the nature of the specific ethical, legal and social issues associated with integrated biondiagnostic systems;
- To create an open platform for a cross-disciplinary discussion
- Discursively explore possible responses to ELSIs
- Collate outcomes of the symposium and incorporate into the SmartHEALTH final report
- Disseminate relevant findings within the consortium

Invitations and further details will be sent to SmartHEALTH partners in January 2008 and to external invitees in March 2008.
